SUMMARY

Computer Science-oriented Artificial Intelligence and Data Science undergraduate with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and problem solving, combined with hands-on experience building backend systems and full-stack applications using Python, FastAPI, and SQL databases. Skilled in designing REST APIs, scalable services, and production-ready software, with additional exposure to Machine Learning and Generative AI for building intelligent application features. Quick to pick up new technologies, comfortable working in fast-paced teams, and driven by curiosity, adaptability, and a strong work ethic.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Backend Development: FastAPI, REST APIs, SQLAlchemy, JWT Authentication, Async Programming, API Integration

Databases: PostgreSQL, MongoDB, MySQL

AI & Machine Learning: LangChain, RAG, LLMs, TensorFlow, Scikit-learn, OpenCV

Developer Tools & Cloud: Git, GitHub, GitLab, Docker, Postman, AWS, Azure

EXPERIENCE

SDE Intern — Avinya Technologies, Pune

Feb 2026 – Jun 2026

- Developed scalable backend applications and REST APIs using Python, FastAPI, and PostgreSQL for enterprise software solutions.
- Designed backend services supporting sprint planning, task generation, work assignment, and conversational features for an internal product (Curatrack).
- Built an Intelligent Document Processing pipeline combining OCR and LLMs for invoice parsing and structured data extraction, integrated via REST APIs.
- Contributed to backend architecture and system design discussions, including API structuring, database schema design, and service scalability planning.
- Collaborated with cross-functional teams using Git, Docker, and GitLab CI/CD workflows to ship production-ready applications.
- Analyzed AWS and Azure usage data to build a cloud cost optimization module, translating raw usage logs into actionable backend recommendations.

PROJECTS

Edify AI — Career Development Platform

[GitHub](#)

Python, FastAPI, Next.js, PostgreSQL, Docker, LangChain

- Developed a full-stack web platform providing personalized learning, resume analysis, interview preparation, and career guidance.
- Designed scalable backend services using FastAPI with JWT authentication, REST APIs, and PostgreSQL database integration.
- Built modular services for ATS Resume Analysis, Learning Path Generation, and Career Assistance with clean API architecture connecting frontend, backend, and AI modules.

LexFlow AI — Document Management & Legal Assistance Platform

[GitHub](#)

Python, FastAPI, PostgreSQL, LangChain, RAG, Vector Database

- Developed a document management and assistance platform using Python and FastAPI, with REST APIs for secure document upload, retrieval, and search.
- Designed efficient document indexing and retrieval pipelines using SQL and vector search for contextual question answering.
- Implemented backend logic combining structured database queries with LLM-based analysis to improve retrieval accuracy.

AgroScan AI — Plant Disease Detection System

[GitHub](#)

Python, TensorFlow, OpenCV, FastAPI

- Developed a plant disease detection application using Python, TensorFlow, and OpenCV, applying transfer learning with MobileNetV2 to achieve 90%+ accuracy.
- Built FastAPI backend services enabling real-time image classification and treatment recommendations.
- Optimized the inference pipeline to reduce prediction latency and improve API response time.

EDUCATION

B.E. Artificial Intelligence & Data Science — PES Modern College of Engineering, Pune

2023 – 2027

CGPA: 9.3 / 10 (up to current semester) — Department Rank 1

SSC (10th): 87% | HSC (12th): 89%

ACHIEVEMENTS

- Won the Best Emerging Talent Award during internship at Avinya Technologies.
- Top 10 Finalist in multiple AI-focused Hackathons — demonstrating problem-solving under time constraints.
- Completed Data Analytics Certification (LinkedIn Learning) and Advanced AI & Green Skills Training (Edunet Foundation).
